**Languages:** Spanish (Native), English (B2), Portuguese (A2)

## PORTFOLIO

## PROFILE

Frontend Developer with a strong background in JavaScript, React, and modern UI design. I combine technical precision with aesthetic sensibility, thanks to my studies in Architecture and Computer Engineering.

I have experience building responsive, accessible, and performance-oriented interfaces, collaborating with multidisciplinary teams, and implementing scalable frontend solutions aligned with design systems and brand identity.

## EXPERIENCE

### Frontend Developer - Intecmar | 2025

- Designed and implemented user interfaces aligned with institutional branding.
- Collaborated on content integration and responsive layouts in WordPress and custom web modules.
- Improved UX consistency and visual hierarchy across the organization's digital ecosystem.

### Frontend Developer & UI Designer - BCA Balcarce | 2025

- Developed the institutional website using Next.js, leveraging server-side rendering for improved SEO and load performance.
- Created reusable UI components and optimized routing with the App Router.
- Integrated brand identity and UX best practices into a cohesive, scalable frontend architecture.

### Frontend Developer & UI/UX Designer - NoCountry (Collaborative Projects)| 2023-2024

- Designed and developed user interfaces for web apps using Figma Next.js and React.
- Collaborated with backend developers and designers in agile teams.
- Defined design systems and reusable component libraries to improve scalability.

## EDUCATION

- Computer Engineering - Universidad Nacional de Mar del Plata (in progress)
- Architecture - Universidad Nacional de Mar del Plata (completed 3 years)
